Weeks, Sally S., Harmon P. Weeks, and George P. Parker. *Native trees of the Midwest : Identification, Wildlife Values, and Landscaping Use*. West Lafayette, IN : Purdue University Press, 2010. Print. Native Trees of the Midwest is a guide to identifying trees in Indiana and surrounding states, written by three leading forestry experts. The authors explain how to identify every species. The book presents an evaluation of each species relative to its ornamental value for those interested in landscaping. Since tree species have value to wildlife, an evaluation of wildlife uses is presented. The book also contains a chapter on introduced species that have become naturalized and invasive throughout the region.
